Dear Pragmatic Patient Practices Client,

The enclosed letter is meant to be an exercise in dealing with the issues that stem from the poor choices your parents made during your upbringing. It is best used as a tool, and should not actually be given to the supposed recipients. Think of it as a way to come to terms with the influences of your childhood on your life. By admitting the wrong that your parents have done, this exercise will enable you to move forward with your own future.

Just fill in the blanks with your situational details, and feel the weight lifted off your shoulders. Your parents are the cause of your problems, and now you can let yourself off the hook a bit. There is no way things could have turned out better for you. Considering what they gave you to work with, you've taken what little you had and made a decent life of it.

Complete the letter, and mail it back to us. That's all you have to do to start your future today!

This letter will be held safely for you upon its completion and return to Pragmatic Patient Practices. Please do not sign your letter; it is meant to be an anonymous exercise so that you can be as open and honest as you wish.

Yours Truly,

The Latency Letters Initiative Team at
